

Fixings & Fastenings

Bright Zinc Plated, Galvanised & Stainless Steel

Lockinex[®]
great service, great quality

INTRODUCTION

The Lockinex Range of Fixings & Fastenings are manufactured in Bright Zinc Plate, Hot dipped galvanised & Stainless Steel. Structural Grade connection bolts and Holding Down bolts are designed to provide proven structural joints and anchoring points in concrete.

APPLICATION

The range includes "Through-bolts" & "Studs" for anchoring structural members to concrete. High Grade Connection bolts are used for joining steel work, connection of Guardrail posts to steel work & more. Many other items such as "U" Bolts, Shims & Stainless Steel bolts are used throughout a range of installations.

DESIGN

High grade bolts, with a high quality finish, for the more demanding environments.

Please refer to appropriate load tables.

Trouser Shim being inserted under a base plate to align and level the vertical post.

F-M12(x) 100mm(y) Through Bolt -(Drill 12mm dia. hole)
 F-M16(x) 140mm(y) Through Bolt - (Drill 16mm dia. hole)
 F-M20(x) 160mm(y) Through Bolt - (Drill 20mm dia. hole)

Lockinex holding down bolt. For use in concrete. Hot dip Galvanised finish.

F-M16(x) 190mm(y) Stud-Use with Chemical Resin System
 F-M20(x) 260mm(y) Stud-Use with Chemical Resin System

Lockinex holding down Stud, use with Chemical Resin.
