

Mezzanine pallet safety gates

Mezzanine Pallet Gates

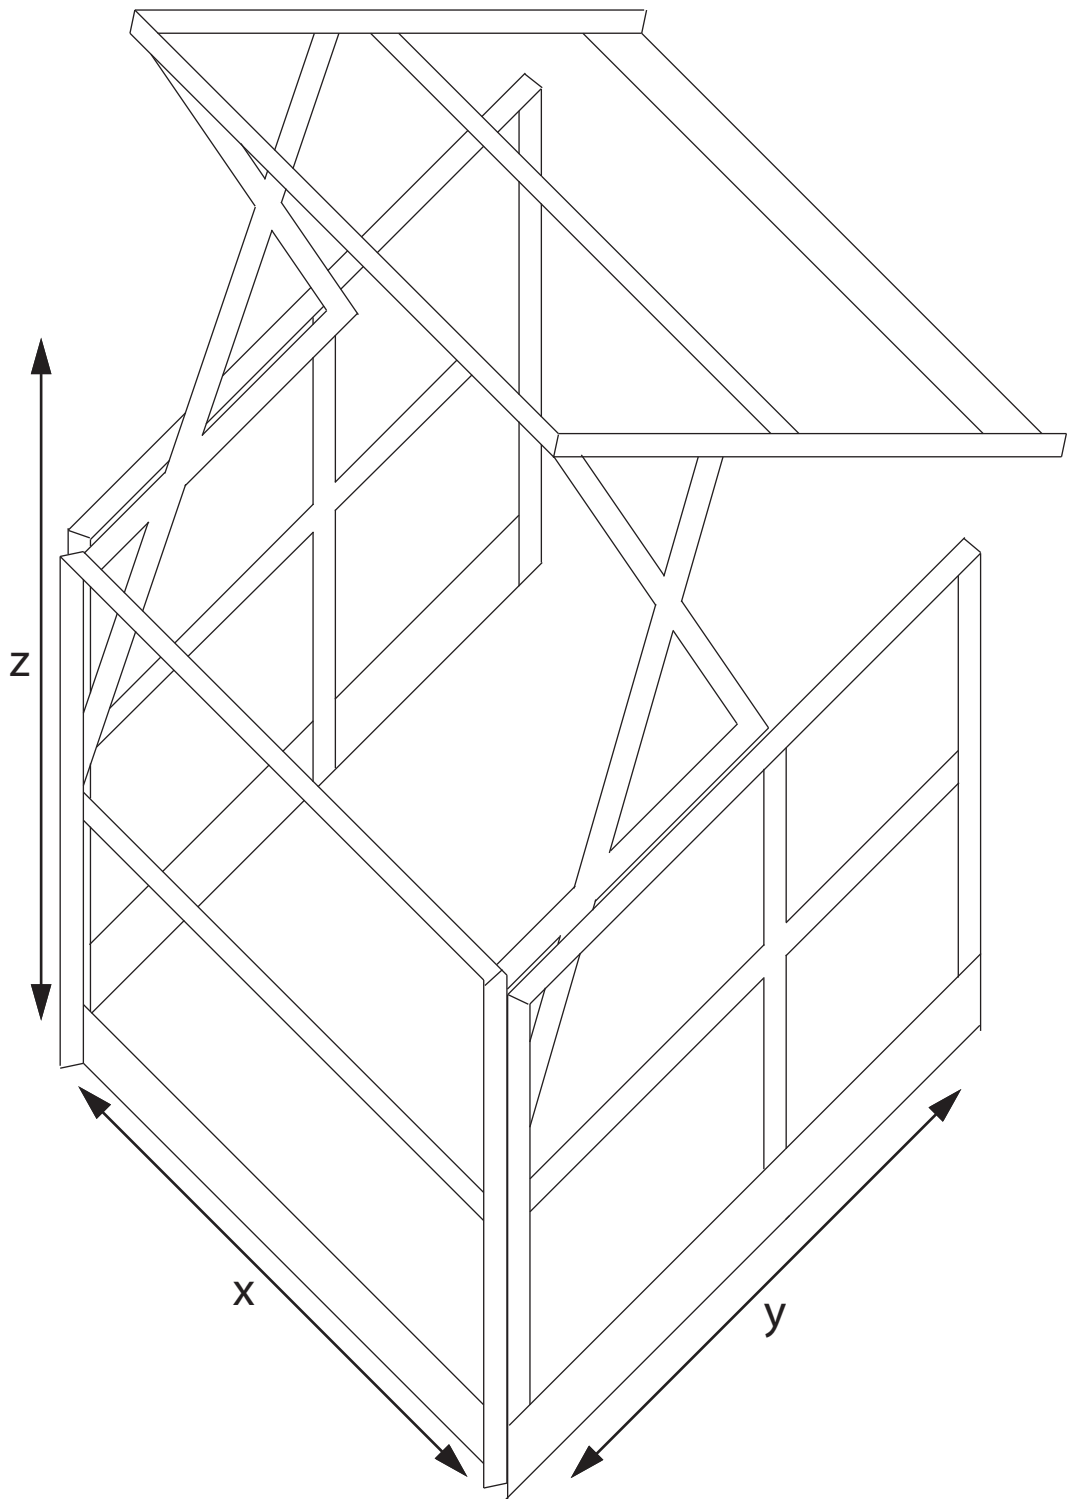

A range of pallet gates in various sizes. Supplied in kit form ready for quick assembly. Pallet gates consist of Lockinex galvanised key clamps and 48.3mm diameter galvanised tube. Cantilevered design makes gates easily operable by one person. All gate designs comply with BS EN 14122-3 loadings and requirements.

All clamps are manufactured to relevant British standards with malleable cast iron fittings to BS EN 1562:2012 and hot dip galvanising to BS EN ISO 1461:2009, so you can be sure to receive a quality product. Tube is manufactured to BS EN 10255:2004 and galvanised to BS EN 10240:1998. Powder coating to your choice of RAL colour is also available for all kits.

*Powder coating is available in a range of RAL colours. Materials to be powder coated go through Phosphate pre-treatment ensuring superior powder coating adhesion and maximum service life.

Product code	Max. Pallet Width 'x' (mm)	Max. Pallet Depth 'y' (mm)	Max. Pallet Height 'z' (mm)
MEZ-1	1500	1500	1800
MEZ-3	2000	1500	1800
MEZ-5	3000	1500	1800

Kits are supplied with components ready to assemble and install with the above finished dimensions. However, if different dimensions are required the horizontal rails etc. can simply be cut down on site to create desired dimensions.
